Samira is a 13 year old girl living in the village of Zaogo, in Burkina Faso. When she finished primary school, she wanted to attend secondary school, but the closest school was 50km from her house!

Without a secondary education, she knew her chance to get a decent job in the future was small. One day, her parents came with wonderful news: *eu can aid!* in cooperation with other European associations had joined together to build a secondary school in Zaogo !

Now Samira is happy to attend the new school. She has a future.

Like Samira, many children can be helped with small donations.

Join us now. Get involved!
